

2020

ANNUAL REPORT

It is with great pride that I report the accomplishments of the STAR team from 2020. Despite the challenges we faced through economic turbulence and the global pandemic, the STAR team came together to deliver vital financial solutions to our clients and solid financial results to our stakeholders. I would be remiss if I didn't pause to thank each STAR team member for their resilience and commitment.

THOMAS M. MARCUCCILLI

2020 Economic Review

2020 will most certainly be remembered as the year of the global COVID-19 pandemic, bringing levels of economic uncertainty not seen since the recession of 2007-2009. The economic shutdown triggered by the pandemic broke records, with second quarter GDP falling 9.1%, leading to a 32.9% annual rate, the most severe decline in history. For the full year, the US economy contracted 2.5%.

In March, the Federal Reserve cut interest rates to zero and launched a massive \$700 Billion quantitative easing program in an attempt to accommodate financial markets. We anticipate rates will remain near zero for the foreseeable future. A sudden increase in inflation due to unparalleled economic stimulus could see interest rates move higher in the short term.

Despite these unprecedented conditions, capital markets remained resilient for the full year. Most stock indexes posted double-digit increases and most bond markets showed healthy gains.

While the national unemployment rate is at 6.2%, the Indiana economy is showing tremendous strength and resilience with a current rate of 4% unemployment among Hoosiers. Continued improvement should boost consumer sentiment and spending, supporting the national and local economies and enabling above-trend economic growth in 2021.

Indiana communities and businesses were not immune from the economic turbulence of 2020; local businesses were shuttered, and safety concerns forced some Hoosiers to work from home for much of the year. As a certified SBA lender, STAR Bank facilitated the Payroll Protection Program (PPP) for more than 1,800 loans, totaling nearly \$275 million in funds helping to retain more than 30,000 Hoosier jobs.

Overall, STAR Financial Bank's average assets grew by \$500 million or 18.6%. This would not have been possible without the success of our lines of business:

- The Commercial Bank realized \$1.34 billion in outstanding loans, growing average outstanding loan dollars by 13.4%.
- The Retail Bank opened 5,545 new checking accounts and grew households by 1.20% year over year.
- Private Banking experienced a 29.3% average deposit growth and added 62 new nameplates representing 4.30% growth.
- STAR Wealth Management closed the year with \$383.9 million in assets under management, representing \$26.2 million in new assets.
- STAR Insurance Agency generated \$761,234 in pre-tax earnings.
- STAR employees averted 118 fraud losses for the bank, totaling \$922,681. In addition, employees averted numerous fraud losses for customers, totaling \$541,450.

At STAR, You're Family

Whether you're a STAR team member, client or community partner, you're a part of our STAR family. In 2020, we strengthened existing bonds while adding new community partnerships. By working together, we supported our communities in safe and meaningful ways.

Even through a pandemic, our team members found ways to give back and continue to support those in need. Through STAR's donation match program, 26 local nonprofits received donations from team members, as well as a matched donation from STAR. In place of client and partner holiday gifts in 2020, STAR donated \$25,000 to The Salvation Army to help support our neighbors in need. To stay connected with each other while working remotely, team members organized virtual coffee breaks, cocktail hours and meet-ups.

Together, STAR Bank and Zionsville Community Schools navigated through challenging times to ensure the success of a new partnership in 2020. In August, we opened a full-service branch in the high school. This unique branch gives Zionsville Community High School students opportunities to work alongside our banking and finance professionals.

Tom Wright, President at STAR presents \$25,000 donation to The Salvation Army. ZCHS students and staff learn alongside STAR Bankers.

In 2020 STAR supported more than 80 non-profit organizations, including:

- American Heart Association
- Arts United of Greater Fort Wayne
- Big Brothers Big Sisters of NE Indiana
- Bishop Dwenger Saints Alive
- Boys and Girls Club of Fort Wayne
- Coats for Kids
- Community Harvest Food Bank
- The Embassy Theatre Foundation
- Erin's House for Grieving Children
- Fort Wayne Ballet
- Fort Wayne Children's Choir
- Fort Wayne Museum of Art
- Fort Wayne Children's Zoo
- Greater Fort Wayne
- Junior Achievement of Northern Indiana
- Kate's Kart
- Northeast Indiana Regional Partnership
- Paul's Place
- Regional Chamber of NE Indiana
- Ronald McDonald House
- The Literacy Alliance
- The Rescue Mission
- Turnstone
- Unity Choir
- YWCA of Fort Wayne
- The Troy Center
- YMCA of Columbia City
- Big Brothers Big Sisters of Central Indiana
- Center for Leadership Development
- Dress for Success
- Fairhaven Foundation
- Fishers Arts Council
- Gary Brackett Impact Foundation
- Habitat for Humanity
- Indiana Golf Foundation
- Indianapolis Symphony Orchestra
- Indianapolis Urban League
- The Salvation Army
- Boys and Girls Club of Grant County
- Hoosier Shakes

Cosmo masks up to welcome students to school.

Leading the Way

STAR's longstanding dedication to technology and innovation paved the way for our team to adjust quickly to the challenges we faced throughout the year. The IT team at STAR delivered exceptional support and security for our systems, allowing the majority of our STAR team to work safely from their homes.

While navigating the remote work environment, the STAR team also supported our clients by bolstering our Interactive Teller Machine (ITM) network. Even when lobbies were closed, clients were able to speak with a STAR banker from the safety of their car via video in the drive-ups. Team members across the organization collaborated to manage the increased traffic to this delivery channel.

We all had to be reactive in many scenarios this year, but the proactive projects and strategies did not cease. The STAR team launched a new online banking platform late in 2020 to streamline the digital banking experience for our customers during a time when technology is more important than ever.

To further enhance our ability to serve customers wherever they are, the STAR team implemented two digital service channels. One channel allows customers to chat with STAR Customer Solutions through instant message, video or audio from their computer or phone. Customers are also able to share their screen with their banker for real-time help and advice. The second channel gives the customer the ability to schedule an appointment online with a banker via telephone, video or in-person.

This STAR Bank ITM was designed by a ZCHS student.

2021 Economic Outlook

In closing, 2020 was a year of many ups and downs and while many of us lived in limbo, not knowing the certainty of the future, the entire company pulled together to navigate and steer our ship through uncharted waters. The results of the STAR team's hard work throughout the year were much better than one would have anticipated in spring of 2020. We are pleased and grateful for our STAR family and look forward to 2021!

Independent Auditor's Report and Consolidated Financial Statements

December 31, 2020 and 2019

200 E. Main Street, Suite 700 | Fort Wayne, IN 46802-1900
260.460.4000 | Fax 260.426.2235 | bkd.com

Independent Auditor's Report

Board of Directors and Stockholders
STAR Financial Group, Inc.
Fort Wayne, Indiana

We have audited the accompanying consolidated financial statements of STAR Financial Group, Inc. (Company) and its subsidiaries, which comprise the consolidated balance sheets as of December 31, 2020 and 2019, and the related consolidated statements of income, comprehensive income, changes in stockholders' equity and cash flows for the years then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of STAR Financial Group, Inc. and its subsidiaries as of December 31, 2020 and 2019, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Report on Internal Control Over Financial Reporting

We also have audited, in accordance with auditing standards generally accepted in the United States of America, STAR Financial Group, Inc.'s internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)* and our report dated March 10, 2021, expressed an unmodified opinion on the effectiveness of the Company's internal control over financial reporting.

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.
December 31, 2020 and 2019
(Table Dollars in Thousands Except Share Data)

Note 1: Nature of Operations and Summary of Significant Accounting Policies

Nature of Operations

STAR Financial Group, Inc. (STAR or the Company) is a bank holding company whose principal activity is the ownership and management of its wholly owned subsidiaries, STAR Financial Bank (Bank), STAR Insurance Agency (Insurance Agency), and STAR Captive Insurance (Captive). In 2013, the Company formed STAR Captive Insurance as a wholly owned subsidiary to insure members of the consolidated group for potential losses in excess of existing insurance policies. The Bank has one wholly owned subsidiary, Titan, Inc. (Titan). In 2020, the Company owned 100% of the newly formed entity, 215 W Main, LLC, which was established to acquire and hold real estate. The Bank is primarily engaged in providing a full range of banking and financial services to individual and corporate customers throughout Central and Northeastern Indiana. The Bank is subject to the regulation of certain federal and state agencies and undergoes periodic examinations by those regulatory authorities. The Bank also provides trust and investment advisory services through a separate division titled STAR Wealth Management (Wealth). STAR Insurance Agency provides various insurance products and services to individuals and corporate customers. Titan is primarily engaged in managing the Bank's investment securities.

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for loan losses, loan servicing rights, valuation of deferred tax assets, other-than-temporary impairments (OTTI) and fair values of financial instruments.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

Cash and Cash Equivalents

All highly liquid investments with original maturities of three months or less are considered to be cash equivalents. Cash and cash equivalents are defined to include the Company's cash on hand and demand deposits with other institutions (including money market mutual funds).

At December 31, 2020, the Company's cash accounts exceeded federally insured limits by approximately \$25,999,000.

Investment Securities

Available-for-sale securities, which include any debt security for which the Company has no immediate plan to sell but which may be sold in the future, are carried at fair value. Unrealized gains and losses are recorded, net of related income tax effects, in other comprehensive income (loss). Changes in the fair value of equity securities is recorded in non-interest income. Amortization of premiums and accretion of discounts are recorded as interest income from securities. Realized gains and losses are recorded as net security gains (losses). Gains and losses on sales of securities are determined on the specific-identification method.

For debt securities with fair value below amortized cost when the Company does not intend to sell a debt security, and it is more likely than not, the Company will not have to sell the security before recovery of its cost basis, it recognizes the credit component of an other-than-temporary impairment of a debt security in earnings and the remaining portion in other comprehensive income (loss). The credit loss component recognized in earnings is identified as the amount of principal cash flows not expected to be received over the remaining term of the security as projected based on cash flow projections.

Loans Held for Sale

Mortgage loans originated and intended for sale in the secondary market are carried at the lower of cost or fair value in the aggregate. Net unrealized losses, if any, are recognized through a valuation allowance by charges to noninterest income. Gains and losses on loan sales are recorded in noninterest income, and direct loan origination costs and fees are deferred at origination of the loan and are recognized in noninterest income upon sale of the loan.

Loans

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at their outstanding principal balances adjusted for unearned income, charge-offs, the allowance for loan losses, any unamortized deferred fees or costs on originated loans and unamortized premiums or discounts on purchased loans.

For loans amortized at cost, interest income is accrued based on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, as well as premiums and discounts, are deferred and amortized as a level yield adjustment over the respective term of the loan.

For all loan classes, the accrual of interest is discontinued at the time the loan is 90 days past due unless the credit is well-secured and in process of collection. Past due status is based on contractual terms of the loan. For all loan classes, the entire balance of the loan is considered past due if the minimum payment contractually required to be paid is not received by the contractual due date. For all loan classes, loans are placed on nonaccrual or charged off at an earlier date if collection of principal or interest is considered doubtful.

Management's general practice is to proactively charge down loans individually evaluated for impairment to the fair value of the underlying collateral. Consistent with regulatory guidance, charge-offs on all loan segments are taken when specific loans, or portions thereof, are considered uncollectible. The Company's policy is to promptly charge these loans off in the period the uncollectible loss is reasonably determined.

For all loan portfolio segments except residential and consumer loans, the Company promptly charges-off loans, or portions thereof, when available information confirms that specific loans are uncollectible based on information that includes, but is not limited to, (1) the deteriorating financial

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.

December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

condition of the borrower, (2) declining collateral values, and/or (3) legal action, including bankruptcy, that impairs the borrower's ability to adequately meet its obligations. For impaired loans that are considered to be solely collateral dependent, a partial charge-off is recorded when a loss has been confirmed by an updated appraisal or other appropriate valuation of the collateral.

The Company charges-off residential and consumer loans, or portions thereof, when the Company reasonably determines the amount of the loss. The Company adheres to timeframes established by applicable regulatory guidance which provides for the charge-down of 1-4 family first mortgages, junior lien mortgages and other secured consumer loans at 90 days past due. Unsecured retail loans are wholly charged off when the loan is 90 days past due.

For all loan classes, all interest accrued but not collected for loans that are placed on nonaccrual or charged off is reversed against interest income. The interest on these loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured. Nonaccrual loans are returned to accrual status when, in the opinion of management, the financial position of the borrower indicates there is no longer any reasonable doubt as to the timely collection of interest or principal. The Company requires a period of satisfactory performance of not less than six months before returning a nonaccrual loan to accrual status.

When cash payments are received on impaired loans in each loan class, the Company records the payment as interest income unless collection of the remaining recorded principal amount is doubtful, at which time payments are used to reduce the principal balance of the loan. Troubled debt restructured loans recognize interest income on an accrual basis at the renegotiated rate if the loan is in compliance with the modified terms, no principal reduction has been granted and the loan has demonstrated the ability to perform in accordance with the renegotiated terms for a period of at least six months.

Allowance for Loan and Lease Losses

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to income. Loan losses are charged against the allowance when management believes the uncollectability of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

The allowance consists of allocated and general components. The allocated component relates to loans that are classified as impaired. For those loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers non-impaired loans and is based on historical charge-off experience by segment. The historical loss experience is determined by portfolio segment and is based on the actual loss history on a weighted average basis experienced by the Company over the prior three years. Management believes the weighted average three-year historical loss experience methodology is appropriate in the current economic environment. Other adjustments (qualitative/environmental considerations) for each segment may be added to the allowance for each loan segment after an assessment of internal or external influences on credit quality that are not fully reflected in the historical loss or risk rating data.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due based on the loan's current payment status and the borrower's financial condition including available sources of cash flows. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for non-homogenous type loans such as commercial, non-owner residential and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price or the fair value of the collateral if the loan is collateral dependent. For impaired loans where the Company utilizes the discounted cash flows to determine the level of impairment, the Company includes the entire change in the present value of cash flows as provision for loan losses.

The fair values of collateral dependent impaired loans are based on independent appraisals of the collateral. In general, the Company acquires an updated appraisal upon identification of impairment and annually thereafter for commercial, commercial real estate and multi-family loans. It is the Company's practice to obtain annual appraisals on impaired loans. The Company applies a discount rate to the appraisal based upon the collateral type. In the case of commercial real estate, the discount rate is 25%. After determining the collateral value as described, the fair value is calculated based on the determined collateral value less selling expenses. The potential for outdated appraisal values is considered in the Company's determination of the allowance for loan losses through the analysis of various trends and conditions including the local economy, trends in charge-offs and delinquencies, etc. and the related qualitative adjustments assigned by the Company.

Segments of loans with similar risk characteristics are collectively evaluated for impairment based on the segment's historical loss experience adjusted for changes in trends, conditions and other relevant factors that affect repayment of the loans. Accordingly, the Company does not separately identify individual consumer and residential loans for impairment measurements, unless such loans are the subject of a restructuring agreement due to financial difficulties of the borrower.

In the course of working with borrowers, the Company may choose to restructure the contractual terms of certain loans. In this scenario, the Company attempts to work-out an alternative payment schedule with the borrower in order to optimize collectability of the loan. Any loans that are modified are reviewed by the Company to identify if a troubled debt restructuring (TDR) has occurred, which is when, for economic or legal reasons related to a borrower's financial difficulties, the Company grants a concession to the borrower that it would not otherwise consider. Terms may be modified to fit the ability of the borrower to repay in line with its current financial status and the restructuring of the loan may include the transfer of assets from the borrower to satisfy the debt, a modification of loan terms, or a combination of the two. If such efforts by the Company

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.

December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

do not result in a satisfactory arrangement, the loan is referred to legal counsel, at which time foreclosure proceedings are initiated. At any time prior to a sale of the property at foreclosure, the Company may terminate foreclosure proceedings if the borrower is able to work-out a satisfactory payment plan.

It is the Company's policy to have any restructured loans which are on nonaccrual status prior to being restructured remain on nonaccrual status until six months of satisfactory borrower performance at which time management would consider its return to accrual status. If a loan was accruing at the time of restructuring, the Company reviews the loan to determine if it is appropriate to continue the accrual of interest on the restructured loan.

With regard to determination of the amount of the allowance for credit losses, troubled debt restructured loans are considered to be impaired. As a result, the determination of the amount of impaired loans for each portfolio segment within troubled debt restructurings is the same as detailed previously.

Bank Owned Life Insurance

Bank owned life insurance consists of investments in life insurance policies on certain key executives and other members of the Bank's management. The policies are carried at their net cash surrender value. Changes in the policy value are recorded as an adjustment to the carrying value with the corresponding amount recognized as non-interest income or expense. Earnings on these policies are based on the net earnings on the cash surrender value of the policies.

Premises and Equipment

Premises and equipment are recorded at cost less accumulated depreciation. The provision for depreciation is computed on the straight-line method over the estimated useful lives of the assets generally ranging from three to 25 years. Leasehold improvements are capitalized and depreciated using the straight-line method over the terms of the respective leases or the estimated useful lives of the improvements, whichever is shorter. Maintenance and repairs are expensed as incurred, while major additions and improvements are capitalized. Gains and losses on disposition are included in the consolidated statements of income.

FHLB Stock

Federal Home Loan Bank (FHLB) stock is a required investment for institutions that are members of the Federal Home Loan Bank system. The required investment in the common stock is based on a predetermined formula, carried at cost and evaluated for impairment. Included in other assets on the consolidated balance sheets is FHLB stock totaling \$6,880,000 and \$6,880,000 at December 31, 2020 and 2019.

Goodwill

Goodwill is evaluated annually for impairment – or more frequently if impairment indicators are present. If the implied fair value of goodwill is lower than its carrying amount, a goodwill impairment is indicated and goodwill is written down to its implied fair value. Subsequent increases in goodwill value are not recorded in the consolidated financial statements.

Intangible Assets

Intangible assets with finite lives are being amortized on the straight-line basis over periods ranging from five to seven years. Such assets are periodically evaluated as to the recoverability of their carrying values.

Other Real Estate Owned

Other real estate owned represents properties acquired through foreclosures or deeds in lieu of foreclosure or former branches held for sale. The properties are recorded at the lower of cost or fair value less estimated costs to sell. Any excess of the loan amount over the net realizable value of such property when acquired is charged to the allowance for loan and lease losses, establishing a new cost basis. In the case of former branches, any excess of net book value over the net realizable value of such property is charged to impairment of premises and equipment. Subsequent write-downs and gains or losses on sales are recorded in the income statement. Costs of maintaining the properties are recorded in the consolidated income statement as incurred. Included in other assets on the consolidated balance sheets is other real estate owned totaling \$2,049,642 and \$2,235,039 at December 31, 2020 and 2019, respectively.

Mortgage Servicing Rights

Mortgage servicing assets are recognized when rights are acquired through the sale of financial assets. Under the servicing assets and liabilities accounting guidance (ASC 860-50), servicing rights resulting from the sale of loans originated by the Company are initially measured at fair value at the date of transfer. The Company subsequently measures each class of servicing asset using the amortization method. Under the amortization method, servicing rights are amortized in proportion to and over the period of estimated net servicing income. The amortized assets are assessed for impairment based on fair value at each reporting date.

Fair value is based on market prices for comparable mortgage servicing contracts, when available, or alternatively, is based on a valuation model that calculates the present value of estimated future net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income, such as the cost to service, the discount rate, the custodial earnings rate, an inflation rate, ancillary income, prepayment speeds and default rates and losses. These variables change from quarter to quarter as market conditions and projected interest rates change, and may have an adverse impact on the value of the mortgage servicing right and may result in a reduction to noninterest income.

Each class of separately recognized servicing assets subsequently measured using the amortization method are evaluated and measured for impairment. Impairment is determined by stratifying rights into tranches based on predominant characteristics, such as interest rate, loan type and investor type. Impairment is recognized through a valuation allowance for an individual tranche, to the extent that fair value is less than the carrying amount of the servicing assets for that tranche. The valuation allowance is adjusted to reflect changes in the measurement of impairment after the initial measurement of impairment. Changes in valuation allowances are reported with mortgage sales and servicing fees on the income statement. Fair value in excess of the carrying amount of servicing assets for that stratum is not recognized.

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.

December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

Servicing fee income is recorded for fees earned for servicing loans. The fees are based on a contractual percentage of the outstanding principal or a fixed amount per loan and are recorded as income when earned. The amortization of mortgage servicing rights is netted against loan servicing fee income.

Transfers of Financial Assets

Transfers of financial assets are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity or the ability to unilaterally cause the holder to return specific assets.

Lease Commitments

The Company adopted ASU 2016-02, 2018-11, and ASU 2018-20 on January 1, 2019. The Company leases certain banking center locations, office space, land and billboards. In determining whether a contract contains a lease, the Company examines the contract to ensure an asset was specifically identified and that the Company has control of use over the asset. To determine whether a lease is classified as operating or finance, the Company performs an economic life test on all building leases with greater than a twenty years term. Further, the Company performs a fair value test to identify any leases that have a present value of future lease payments over the lease term that is greater than 90% of the fair value of the building.

At lease inception, the Company determines the lease term by adding together the minimum lease term and all optional renewal periods that it is reasonably certain to renew. The Company determines this on each lease by considering all relevant contract based, asset-based, market-based, and entity-based economic factors. Generally, the exercise of lease renewal options is at the Company's sole discretion. The lease term is used to determine whether a lease is operating or finance and is used to calculate straight-line rent expense. Additionally, the depreciable life of leasehold improvements is limited by the expected lease term.

Operating lease rentals are expensed on a straight-line basis over the life of the lease beginning on the date the Company takes possession of the property. Rent expense and variable lease costs are included in occupancy expense on the Company's consolidated statements of income. Included in variable lease costs are leases with rent escalations based on recent financial indices, such as the Consumer Price Index, where the Company estimates future rent increases and records the actual difference to variable costs. Certain leases require the Company to pay common area maintenance, real estate taxes, insurance and other operating expenses associated with the leases premises. These expenses are classified in occupancy expense, consistent with similar costs for owned locations. There are no residual value guarantees, restrictions or covenants imposed by leases.

The Company accounts for lease and non-lease components together as a single lease component by class of underlying asset. Operating lease obligations with an initial term longer than 12 months are recorded with a right of use asset and a lease liability in the consolidated balance sheet.

The discount rate used in determining the lease liability and related right of use asset is based upon what would be obtained by the Company for similar loans as an incremental rate as of the date of origination or renewal.

Income Taxes

The Company accounts for income taxes in accordance with income tax accounting guidance (ASC 740, *Income Taxes*). The income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income or excess of deductions over revenue. The Company determines deferred income taxes using the liability method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases of assets and liabilities, and enacted changes in tax rates and laws are recognized in the period in which they occur.

Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. Deferred tax assets are reduced by a valuation allowance if, based on the weight of evidence available, it is more likely than not that some portion or all of a deferred tax asset will not be realized. Uncertain tax positions are recognized if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term more likely than not means a likelihood of more than 50% the terms examined and upon examination also include resolution of the related appeals or litigation processes, if any. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50% likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more-likely-than-not recognition threshold considers the facts, circumstances and information available at the reporting date and is subject to management's judgment.

The Company files consolidated income tax returns with its subsidiaries. The Company recognizes interest and penalties, if any, as income tax expense.

Treasury Stock

Common stock shares repurchased are recorded at cost. Cost of shares retired or reissued is determined using the first-in, first-out method.

Basic Earnings Per Share

Basic earnings per share are based on the weighted average number of common shares outstanding. STAR had no potentially dilutive common shares outstanding during 2020 or 2019.

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.

December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

Subsequent Events

Subsequent events have been evaluated through March 10, 2021, which is the date the consolidated financial statements were available to be issued. In early 2021, STAR announced plans to begin construction on their new headquarters which will be located in downtown Fort Wayne. Construction is set to begin in early 2021. The Company has entered into construction-related contracts in the amount of \$36 million.

On March 1, 2021, STAR Insurance Agency entered into an asset purchase agreement to sell its entire book of business for a purchase price of \$16 million.

The coronavirus (COVID-19) outbreak and the resulting economic disruption have impacted the Company's customers directly or indirectly. If the pandemic persists, the Company could experience a material adverse effect on its business, financial condition, and results of operations. The duration of these uncertainties and the ultimate financial effects cannot fully be reasonably estimated at this time.

Note 2: Future Change in Accounting Principle

In June 2016, the FASB issued ASU No. 2016-13, "*Financial Instruments-Credit Losses (Topic 326) - Measurement of Credit Losses on Financial Instruments*." The provisions of ASU 2016-13 were issued to provide financial statement users with more decision-useful information about the expected credit losses on financial instruments that are not accounted for at fair value through net income, including loans held for investment, held-to-maturity debt securities, trade and other receivables, net investment in leases and other commitments to extend credit held by a reporting entity at each reporting date. ASU 2016-13 requires that financial assets measured at amortized cost be presented at the net amount expected to be collected, through an allowance for credit losses that is deducted from the amortized cost basis. The amendments in ASU 2016-13 eliminate the probable incurred loss recognition in current GAAP and reflect an entity's current estimate of all expected credit losses. The measurement of expected credit losses is based upon historical experience, current conditions, and reasonable and supportable forecasts that affect the collectibility of the financial assets. In May 2019, the FASB issued final amendments (ASU No. 2019-05) to provide entities that have certain instruments measured at amortized cost within the scope Topic 326 with an option to irrevocably elect the fair value option in Topic 825 on an instrument-by-instrument basis for eligible instruments, upon adoption of Topic 326. The fair value option election does not apply to held-to-maturity debt securities.

Credit losses relating to available-for-sale debt securities will be recorded through an allowance for credit losses rather than as a direct write-down to the security.

ASU 2016-13 and 2019-05 are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2022. Early adoption is permitted for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. The Company's cross-functional team continues to work through its implementation plan including the assessment and documentation of processes, internal controls and data as well as model development. The Company implemented a third-party software solution to assist in the application of the new standard including portfolio segmentation according to shared risk characteristics and modeling methodologies. The Company is currently refining qualitative factors and forecast periods. The Company is also focused on running a parallel analysis to its current allowance for loan loss model prior to implementation. While a one-time cumulative-effect adjustment to retained earnings will be recorded as of the beginning of the first reporting period in which the guidance is effective, the impact of adopting ASU 2016-13 cannot be reasonably estimated at this point and could be significantly influenced by the composition, characteristics and quality of the loan and lease portfolio as well as the prevailing economic conditions and forecasts as of the adoption date.

Note 3: Restriction on Cash and Due From Banks

The Bank is required by the Federal Reserve to maintain a portion of its deposits in the form of cash and/or on deposit with the Federal Reserve Bank. The amount of the required reserve balance as of December 31, 2020, was \$0.

Note 4: Investment Securities

The amortized cost and approximate fair values, together with gross unrealized gains and losses, of securities are as follows:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
December 31, 2020				
U.S. Treasury and agency securities	\$ 8,336	\$ 99	\$ —	\$ 8,435
Obligations of states and political subdivisions	232,686	12,280	117	244,849

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.

December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

Company will be required to sell the investments before recovery of their amortized cost basis, which may be maturity, the Company does not consider those investments to be other-than-temporarily impaired at December 31, 2020.

Pooled Trust Preferred Securities

Pooled trust preferred securities within the available-for-sale portfolio include six securities which are collateralized by trust preferred securities principally issued by banks. As of December 31, 2020, there were six pools and one pool was determined to be fully impaired and was written off against earnings in a prior period. As of December 31, 2020, the remaining five pools were rated below investment grade. The remaining five securities rated below investment grade were evaluated for impairment as discussed below and not deemed to be other-than-temporarily impaired. The Company's unrealized losses on pooled trust preferred securities were primarily caused by deterioration in the financial status of the institutions within the respective pools and sector downgrades by analysts and rating agencies.

Other-Than-Temporary Impairment

Upon acquisition of a security, the Company decides whether it is within the scope of the accounting guidance for beneficial interests in securitized financial assets or will be evaluated for impairment under the accounting guidance for investments in debt and equity securities.

The accounting guidance for beneficial interests in securitized financial assets provides incremental impairment guidance for a subset of the debt securities within the scope of the guidance for investments in debt and equity securities. For securities where the security is a beneficial interest in securitized financial assets, the Company uses the beneficial interests in securitized financial asset impairment model.

The Company conducts quarterly reviews to identify and evaluate each investment security to determine whether an other-than-temporary impairment has occurred. Economic models are used to determine whether an other-than-temporary impairment has occurred on these securities. While all securities are considered, the securities primarily impacted by other-than-temporary impairment testing are pooled trust preferred securities. For each trust preferred security in the investment portfolio, an extensive, regular review is conducted to determine if an other-than-temporary impairment has occurred. As part of its impairment analysis, management reviewed the underlying institutions' most recently available financial performance to assist management in applying the appropriate constant default rate to its cash flow projections for each security. To determine the range and likelihood of potential principal and interest losses on these tranches, management evaluated cash flow projections encompassing multiple market assumptions, including default rates, recoveries and severity. Based upon these cash flow projections and all other information available, management projected that all future contractual principal and interest payments will be received and no additional other-than-temporary impairment existed as of December 31, 2020. If economic conditions worsen, it is possible that the securities that are currently performing satisfactorily could suffer impairment and could potentially require write-downs in future periods.

Credit Losses Recognized on Investments

Certain debt securities have experienced fair value deterioration due to credit losses, as well as due to other market factors, but are not otherwise other-than-temporarily impaired.

The following table provides information about debt securities for which only a credit loss was recognized in income.

	Accumulated Credit Losses	
	2020	2019
Credit losses on debt securities held		
Beginning of year	\$ 3,574	\$ 3,574
Additions related to other-than-temporary losses not previously recognized	—	—
End of year	\$ 3,574	\$ 3,574

Note 5: Loans and Allowance for Loan and Lease Losses

STAR's business activity is primarily with customers located in north central and northeast Indiana. The loan portfolio is diversified by type and industry. Collateral requirements for each loan are based upon the credit evaluation of each transaction.

Classes of loans at December 31, include:

	2020	2019
Commercial and industrial	\$ 769,566*	\$ 558,157
Commercial real estate	569,310	580,952
Consumer:		
Consumer, home equity lines of credit	68,549	77,863
Consumer, auto	15,891	18,185
Consumer, other	15,559	22,869
Residential	252,853	207,590
Finance leases	20,641	21,858
Gross loans	1,712,369	1,487,474
Allowance for loan losses	(23,111)	(19,081)
Net loans	\$ 1,689,258	\$ 1,468,393

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.
December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

*In 2020, STAR originated \$268,086,000 in Paycheck Protection Program (PPP) loans and there was \$234,579,000 outstanding at December 31, 2020.

The components of the Company's direct financing leases as of December 31 are summarized below:

	2020	2019
Future minimum lease payments	\$ 20,832	\$ 22,148
Residual interests	1,359	1,654
Initial direct costs	30	23
Unearned income	(1,580)	(1,967)
	<u>\$ 20,641</u>	<u>\$ 21,858</u>

Future minimum lease payments are as follows:

2021	\$ 8,757
2022	4,743
2023	2,729
2024	1,711
2025	829
Thereafter	2,063
	<u>\$ 20,832</u>

The risk characteristics of each loan portfolio segment are as follows:

Commercial and Industrial and Commercial Real Estate

Commercial and industrial loans are primarily based on the identified cash flows of the borrower and secondarily on the underlying collateral provided by the borrower. The cash flows of borrowers; however, may not be as expected and the collateral securing these loans may fluctuate in value. Most commercial loans are secured by the assets being financed or other business assets, such as accounts receivable or inventory, and may include a personal guarantee. Short-term loans may be made on an unsecured basis. In the case of loans secured by accounts receivable, the availability of funds for the repayment of these loans may be substantially dependent on the ability of the borrower to collect amounts due from its customers.

Commercial real estate loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Commercial real estate lending typically involves higher loan principal amounts and the repayment of these loans is generally dependent on the successful operation of the property securing the loan or the business conducted on the property securing the loan. Commercial real estate loans may be more adversely affected by conditions in the real estate markets or in the general economy. The characteristics of properties securing the Company's commercial real estate portfolio are diverse, but with geographic location almost entirely in the Company's market area. Management monitors and evaluates commercial real estate loans based on collateral, geography and risk grade criteria. In general, the Company avoids financing single purpose projects unless other underwriting factors are present to help mitigate risk. In addition, management tracks the level of owner-occupied commercial real estate versus nonowner-occupied loans.

Real Estate, Consumer, Leases and Other

Real estate, consumer, leases and other loans consist of four segments - residential mortgage loans, personal loans, direct financing leases and other loans. For residential mortgage loans that are secured by 1-4 family residences and are generally owner-occupied, the Company generally establishes a maximum loan-to-value ratio and requires private mortgage insurance if that ratio is exceeded. Home equity loans are typically secured by a subordinate interest in 1-4 family residences. Consumer personal, leases and other loans are secured by consumer personal assets, such as automobiles or recreational vehicles. Some consumer personal loans are unsecured, such as small installment loans and certain lines of credit. Repayment of these loans is primarily dependent on the personal income of the borrowers, which can be impacted by economic conditions in their market areas, such as unemployment levels. Repayment can also be impacted by changes in property values on residential properties. Risk is mitigated by the fact that the loans are of smaller individual amounts and spread over a large number of borrowers.

The following tables present the balance in the allowance for loan losses and the recorded investment in loans based on portfolio segment and impairment method as of December 31, 2020 and 2019:

	2020					
	Commercial and Industrial	Commercial Real Estate	Consumer	Residential	Finance Leases	Total

Internal Risk Categories

Loan grades are numbered 1 through 10. Grades 1 through 6 are considered satisfactory grades. The grade of 7, or Watch, represents loans of lower quality and is considered criticized. The grades of 8, or Substandard, and 9, or Special Mention, and 10, or Loss, refer to assets that are classified. The use and application of these grades by the Bank conform to the Bank's policy.

Prime (1) loans have exceptional credit fundamentals, including stable and predictable income and balance sheet performance; highly regarded with excellent management and management depth.

Good (2) loans have very good credit fundamentals but less predictable income and balance sheet performance than a prime graded credit. Loans have regional exposure in stable industry with seasoned management.

Satisfactory (3) loans are medium size or a local company in a good industry with predictable income and balance sheet performance over time.

Pass (4) all loans with acceptable credit risk but of a moderate to small size for local markets. Credit compares equally or favorably to peers and competitors with a solid balance sheet and profitability with some volatility.

Pass Minus (5) loans are credits where overall risk associated with creditworthiness criteria is considered higher than normal and warrant attention. Startup or less seasoned company within cyclical industry with moderate levels of volatility and deterioration of credit fundamentals.

Risk rated with caution (6) loans are credits where overall risk associated with creditworthiness criteria are less desirable but with potential. High or increasing risk dependence upon collateral or guarantor for protection with weaker or deteriorating financial trends.

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.

December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

Watch (7) all credits where overall credit fundamentals need continued review. Considered higher risk with unfavorable characteristics present. Risk, however, remains reasonable. Borrowings would usually be on a fully secured basis.

Substandard (8) credits have well-defined weaknesses where payment default is possible but not yet probable. Deficiencies are not corrected quickly and financing alternatives are limited. Reliance on collateral and guarantors is increased.

Doubtful (9) loans are credits where the possibility of loss is high, repayment is erratic or nonexistent, and loan is collateral dependent or firm in bankruptcy.

Loss (10) loans are no longer considered bankable assets.

Nonperforming mortgage, home equity and consumer loans on non-accrual or greater than 90 days past due and are internally monitored monthly by management.

Performing all other mortgage, home equity and consumer loans.

The following table presents the credit risk profile of the Company's commercial, commercial real estate, and finance leases loan portfolios based on internal rating category as of December 31, 2020 and 2019:

Grade	Commercial and Industrial		Commercial Real Estate		Finance Leases	
	2020	2019	2020	2019	2020	2019

A loan is considered impaired, in accordance with the impairment accounting guidance (ASC 310-10-35-16), when based on current information and events, it is probable the Company will be unable to collect all amounts due from the borrower in accordance with the contractual terms of the loan. Impaired loans include nonperforming commercial loans but also include loans modified in troubled debt restructurings.

The following tables present impaired loans as of and for the years ended December 31, 2020 and 2019:

	2020					
	Recorded Balance	Unpaid Principal Balance	Specific Allowance	Average Investment in Impaired Loans	Interest Income Recognized	Interest Income Recognized on Cash Basis
Loans without a specific valuation allowance:						
Commercial and industrial	\$ 5,820	\$ 5,820	\$ —	\$ 763	\$ 588	\$ 589
Commercial real estate	8,655	8,720	—	2,093	321	292
Loans with a specific valuation allowance:						
Commercial and industrial	6,362	14,050	6,036	1,272	62	37
Total impaired loans	\$ 20,837	\$ 28,590	\$ 6,036	\$ 4,128	\$ 971	\$ 918

	2019					
	Recorded Balance	Unpaid Principal Balance	Specific Allowance	Average Investment in Impaired Loans	Interest Income Recognized	Interest Income Recognized on Cash Basis
Loans without a specific valuation allowance:						
Commercial and industrial	\$ 3,872	\$ 4,732	\$ —	\$ 4,643	\$ 74	\$ 25
Commercial real estate	1,886	1,948	—	1,932	58	55
Loans with a specific valuation allowance:						
Commercial and industrial	5,376	13,051	5,076	6,378	3	3

Total impaired loans	\$ 16,648	\$ 25,246	\$ 5,893	\$ 18,546	\$ 318	\$ 266

The following table presents the Company's nonaccrual loans at December 31, 2020 and 2019. This table excludes purchased impaired loans and performing troubled debt restructurings.

	2020	2019
Commercial and industrial	\$ 5,852	\$ 7,108
Commercial real estate	163	385
Consumer		
Consumer, home equity lines of credit	48	192
Consumer, auto	—	2
Consumer, other	12	46
Residential	253	441
Finance leases	—	—
Total	\$ 6,328	\$ 8,174

The Company identified as troubled debt restructurings certain receivables for which the allowance for loan losses had previously been measured under a general allowance for loan losses methodology. Upon identifying those receivables as troubled debt restructurings, the Company identified them as impaired under the guidance in Accounting Standards Codification (ASC) 310-10-35. The ASU requires prospective application of the impairment measurement guidance in ASC 310-10-35 for those receivables newly identified as impaired.

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.

December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

At December 31, 2020 and 2019, the Company had a number of loans that were modified in troubled debt restructurings and impaired. The modification of terms of such loans included one or a combination of the following: an extension of maturity, a reduction of the stated interest rate or a permanent reduction of the recorded investment in the loan.

The following tables present information regarding troubled debt restructurings by class for the year ended December 31, 2020 and 2019.

Newly restructured loans:

	Number of Loans	Pre-Modification Recorded Balance	Post-Modification Recorded Balance
December 31, 2020			
Commercial and industrial	8	\$ 2,219	\$ 2,219
Commercial real estate	1	133	133
Consumer			
Consumer, Residential	1	38	38
	10	\$ 2,390	\$ 2,390
December 31, 2019			
Commercial and industrial	6	\$ 1,360	\$ 1,360
Commercial real estate	2	372	372
Consumer			
Consumer, Residential	1	91	91
	9	\$ 1,823	\$ 1,823

The troubled debt restructurings described above did not materially increase the allowance for loan losses for the years ended December 31, 2020 and 2019. The troubled debt restructurings described above did not result in any charge offs during the years ended December 31, 2020 and 2019.

Newly restructured loans by type of modification:

	2020			
	Interest Only	Term	Combination	Total Modification
Commercial and industrial	\$ —	\$ 451	\$ 1,768	\$ 2,219
Commercial real estate	—	—	133	133
Consumer				
Consumer, Residential	—	—	38	38
	\$ —	\$ 451	\$ 1,939	\$ 2,390
	2019			
	Interest Only	Term	Combination	Total Modification
Commercial and industrial	\$ —	\$ —	\$ 1,360	\$ 1,360
Commercial real estate	—	—	372	372
Consumer				
Consumer, Residential	—	91	—	91
	\$ —	\$ 91	\$ 1,732	\$ 1,823

There were no troubled debt restructurings modified in the past 12 months that subsequently defaulted.

As of December 31, 2020, there were \$0 of loans designated as TDRs that met the criteria for placement back on accrual status. This criteria is a minimum of six months of payment performance under existing modified terms.

On March 27, 2020, the President of the United States signed the Coronavirus Aid, Relief, and Economic Security Act (the "CARES Act"), which provides entities with optional temporary relief from certain accounting and financial reporting requirements under U.S. GAAP. Section 4013 of the CARES Act allows financial institutions to suspend application of certain TDR accounting guidance for loan and lease modifications related to the COVID-19 pandemic made between March 1, 2020 and the earlier of December 31, 2020 or 60 days after the end of the COVID-19 national emergency, provided certain criteria are met. Section 4013 of the CARES Act was amended on December 27, 2020 to extend this relief until January 1, 2022. The relief can be applied to loan and lease modifications for borrowers that were not more than 30 days past due as of December 31, 2019 and to loan and lease modifications that defer or delay the payment of principal or interest, or change the interest rate on the loan. The Company chose to apply this relief to eligible loan and lease modifications. At December 31, 2020, loan and lease modification balances related to the COVID-19 pandemic were \$4 million.

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.

December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

The Company had \$0 and \$185,000 of foreclosed residential real estate property obtained by physical possession as of December 31, 2020 and 2019, respectively. The Company had no consumer mortgage loans secured by residential real estate properties for which foreclosure proceedings are in process according to local jurisdictions as of December 31, 2020 and 2019.

Note 6: Premises and Equipment

Premises and equipment as of December 31 are summarized as follows:

	2020	2019
Land	\$ 15,522	\$ 15,316
Buildings and improvements	35,880	33,726
Furniture and equipment	34,187	33,692
	85,589	82,734
Less accumulated depreciation	(47,809)	(43,462)
Net premises and equipment	\$ 37,780	\$ 39,272

Note 7: Loan Servicing

Mortgage loans serviced for others are not included in the accompanying consolidated balance sheets. The unpaid principal balances of mortgage loans serviced for others were approximately \$324,936,000 and \$351,720,000 at December 31, 2020 and 2019, respectively.

Custodial escrow balances maintained in connection with the foregoing loan servicing, and included in other liabilities, were approximately \$1,450,000 and \$1,300,000 at December 31, 2020 and 2019, respectively.

Mortgage servicing rights are included in other assets in the accompanying consolidated balance sheets. Comparable market values and a valuation model that calculates the present value of future cash flows were used to estimate fair value.

Activity in the balance of servicing assets was as follows:

	2020	2019
Carrying amount, beginning of year	\$ 1,782	\$ 2,118
Servicing obligations that result from transfers of financial assets	604	355
Amortization	(939)	(640)
Change in valuation allowance	(45)	(51)
Carrying amount, end of year	\$ 1,402	\$ 1,782
Valuation allowance, beginning of year	\$ (59)	\$ (8)
Valuation allowance recorded	(45)	(51)
Valuation allowance, end of year	\$ (104)	\$ (59)
Fair value, beginning of year	\$ 2,923	\$ 4,011
Fair value, end of year	\$ 1,661	\$ 2,923

Note 8: Time Deposits

At December 31, the scheduled maturities of time deposits are as follows:

2021	\$ 108,582
2022	12,586
2023	5,015
2024	2,645
2025	1,216
Thereafter	1,298
	\$ 131,342

Time deposits with balances of \$250,000 or greater were approximately \$14,965,000 and \$25,855,000 at December 31, 2020 and 2019, respectively.

Note 9: Short-Term Borrowings

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.

December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

Short-term borrowings at December 31 included the following:

	2020	2019
Securities sold under repurchase agreements	\$ _____	\$ 41,289

Securities sold under agreements to repurchase consist of obligations of the Company to other parties. The obligations are secured primarily by municipal and U.S. Government securities and such collateral is held in safekeeping by third parties. Agreements with a maturity of one year or less are included in short-term borrowings, while those with a maturity of more than one year are included in long-term debt. The maximum amount outstanding for all agreements at any month end during 2020 and 2019 totaled \$48,144,000 and \$42,910,000 and the daily average of such agreements totaled \$23,738,000 and \$27,777,000.

The Company no longer offers the transfers of various securities to customers in exchange for cash at the end of each business day which had previously agreed to acquire the securities at the end of the next business day for the cash exchanged plus interest.

Note 10: Long-Term Borrowings

As of December 31, 2020 and 2019, STAR had Federal Home Loan Bank of Indianapolis advances (advances) outstanding totaling \$20,173,000 and \$20,191,000, respectively. The advances bear interest at rates ranging from 0.86% to 5.99% and mature at various dates through December 30, 2029.

One of the advances in the amount of \$10 million contained a put option at the end of 2020, whereby FHLB might require the Company to pay the advance.

Interest is paid monthly and the weighted average interest rate on the advances was 1.65% and 1.65% as of December 31, 2020 and 2019, respectively. The advances at December 31, 2020, are secured by first-mortgage loans totaling \$294,351,000 and are subject to restrictions or penalties in the event of prepayment.

The Bank also has an automobile note payable of \$0 and \$21,000 outstanding as of December 31, 2020 and 2019, respectively. The note is interest free and requires monthly principal payments.

Maturities of long-term debt are as follows: 2021 - \$10,147,000; 2022 - \$13,000; 2023 - \$13,000; 2024 - \$0; 2025 - \$0 and \$10,000,000 thereafter.

The Company has established borrowing capacity of \$355,000,000 and \$335,000,000 as of December 31, 2020 and 2019, respectively, with the Federal Home Loan Bank and other financial institutions, of which \$20,173,000 and \$20,191,000 was outstanding at December 31, 2020 and 2019, respectively. In addition to the other borrowings, the Company also had \$1,000,000 and \$1,000,000 letters of credit available as of December 31, 2020 and 2020, respectively.

Note 11: Subordinated Debentures

In March 2006, the Company formed STAR Capital Trust I (Trust I) and STAR Capital Trust II (Trust II) which are both statutory business trusts. Trust I issued \$5,155,000 of trust preferred capital securities as a participant in a pooled trust preferred securities offering. The Company issued subordinated debentures aggregating \$5,155,000 to Trust I. The subordinated debentures are the sole assets of Trust I. The subordinated debentures and the trust preferred securities pay interest and dividends, respectively, on a quarterly basis. The subordinated debentures and trust preferred capital securities bear interest at a rate of three-month LIBOR (0.24%) plus 1.40% (1.64%) and mature on June 30, 2036, and are non-callable for five years after issuance. The securities may be called at any quarterly interest date at par.

Trust II issued \$5,155,000 of trust preferred capital securities as a participant in a pooled trust preferred securities offering. The Company issued subordinated debentures aggregating \$5,155,000 to Trust II. The subordinated debentures are the sole assets of Trust II. The subordinated debentures and the trust preferred securities pay interest and dividends, respectively, on a quarterly basis. The subordinated debentures and trust preferred capital securities bear interest at a rate of three-month LIBOR (0.24%) plus 1.40% (1.64%) and mature on June 30, 2036. The securities may be called at any quarterly interest date at par.

The trust preferred capital securities, subject to certain limitations, are included in Tier I Capital for regulatory purposes. Trust I and Trust II are not consolidated into the Company and as a result, the Company accounts for the investment in Trust I and Trust II as assets, the subordinated debentures as debt, and the interest paid/received thereon as interest expense/income.

Note 12: Common Stock

The Company has 5,000,000 special shares which may be issued and would have such voting, dividend, liquidation and other rights and preferences as specified by the Board of Directors.

STAR declared \$3,973,000 (\$1.16 per common share) of cash dividends during the year ended December 31, 2020 and \$3,865,000 (\$1.11 per common share) during the year ended December 31, 2019.

Note 13: Income Tax Expense

The Company files income tax returns in the U.S. federal jurisdiction and various states and local jurisdictions. With a few exceptions, the Company is no longer subject to U.S. federal, state and local or income tax examinations by tax authorities for years before 2016.

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.

December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

Income tax provision is summarized as follows:

	2020	2019
Current		
Federal	\$ 5,602	\$ 5,249
State	1,224	1,237
Deferred	(1,702)	(681)
Total tax expense	\$ 5,124	\$ 5,805

A net deferred tax asset is included in other assets and is comprised of the following temporary differences at December 31:

	2020	2019
Deferred tax assets		
Allowance for loan and lease losses	\$ 6,075	\$ 5,126
Other nondeductible accruals	1,330	1,734
Other	2,066	953
	9,471	7,813
Deferred tax liabilities		
Mortgage servicing rights	(349)	(463)
Premises and equipment, including equipment leased to others	(3,219)	(3,345)
Unrealized gains on available-for-sale securities	(2,883)	(944)
Other	(1,047)	(851)
	(7,498)	(5,603)
Total net deferred taxes	\$ 1,973	\$ 2,210

A reconciliation of income tax expense at the statutory rate to the Company's actual income tax expense is as follows:

	2020	2019
Income taxes at statutory rate	21.0%	21.0%
State income taxes, net of federal benefit	2.5	3.0
Tax-exempt interest	(4.1)	(3.0)
Bank owned life insurance	(0.6)	(0.7)
Captive insurance income	(1.3)	(1.1)
Tax credits	(0.1)	(0.1)
Other, net	(0.1)	(0.1)
Effective tax rate	17.3%	19.0%

At December 31, 2020, the Company had no general income tax credit carryovers.

Note 14: Accumulated Other Comprehensive Income/(Loss)

The components of accumulated other comprehensive income (loss), included in stockholders' equity, are as follows:

	2020	2019
Net unrealized gain on available-for-sale securities	\$ 13,634	\$ 4,403
Net unrealized (loss) on derivatives used for cash flow hedges	(167)	(123)
Tax effect	(2,807)	(869)
Net-of-tax amount	\$ 10,660	\$ 3,411

Note 15: Employee Retirement and Savings Plans

STAR has an Employee Stock Ownership Plan (ESOP). As of December 31, 2020 and 2019, there were 280,062 and 281,062 shares in the ESOP, all of which have been allocated to participant's accounts. The fair value of the allocated shares was approximately \$20,164,000 and \$22,766,000 at December 31, 2020 and 2019, respectively. Upon termination, retirement or disability an employee has the option to receive his/her shares or require the ESOP to purchase such shares at a predetermined value to the ESOP, as defined in the ESOP Agreement. The ESOP has the option to purchase the shares over a five-year period. The amount of payment is based upon the value at the time of payment. In the event that the ESOP does not have sufficient cash available, STAR is required to purchase such shares at the same value.

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.

December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

STAR also has a Section 401(k) savings plan for substantially all employees. The savings plan provides that STAR may contribute up to 50% of the amount of compensation deferred by the employee, up to 5%. STAR contributed \$1,072,000 and \$950,000 to the plans in 2020 and 2019, respectively.

Note 16: Derivative Financial Instruments

Cash Flow Hedges

As a strategy to maintain acceptable levels of exposure to the risk of changes in future cash flow due to interest rate fluctuations, the Company entered into interest rate swap agreements for a portion of its floating rate debt. The agreements provide for the Company to receive interest from the counterparty at three month LIBOR (0.24%) and to pay interest to the counterparty at a fixed rate of 2.38% on a notional amount of \$10,000,000 at December 31, 2020 and 2019. Settlement is made quarterly.

Management has designated the interest rate swap agreement as a cash flow hedging instrument. For derivative instruments that are designated and qualify as a cash flow hedge, the effective portion of the gain or loss on the derivative is reported as a component of other comprehensive income and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. Gains and losses on the derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in current earnings. At December 31, 2020 and 2019, the Company's cash flow hedge was effective and is not expected to have a significant impact on the Company's consolidated net income over the next 12 months.

The Company offers interest rate derivative products (e.g. interest rate swaps) to certain of its high-quality commercial borrowers. This product allows customers to enter into an agreement with the Company to swap their variable rate loan to a fixed rate. These derivative products are designed to reduce, eliminate or modify the risk of changes in the borrower's interest rate or market price risk. The extension of credit incurred through the execution of these derivative products is subject to the same approvals and underwriting standards as the related traditional credit product. The Company limits its risk exposure to these products by entering into a mirror-image, offsetting swap agreement with a separate, well-capitalized and rated counterparty previously approved by the Company's Asset Liability Committee. By using these interest rate swap arrangements, the Company is also better insulated from the interest rate risk associated with underwriting fixed-rate loans. These derivative contracts are not designated against specific assets or liabilities under FASB ASC 815-10 and, therefore, do not qualify for hedge accounting. The derivatives are recorded on the balance sheet at fair value and changes in fair value of both the customer and the offsetting swap agreements are recorded (and essentially offset) in non-interest income. The fair value of the derivative instruments incorporates a consideration of credit risk (in accordance with FASB ASC 820-10), resulting in some insignificant volatility in earnings each period. The notional amounts of the interest rate swaps were approximately \$15,765,000 and \$20,891,000 at December 31, 2020 and 2019, respectively.

The following table presents the fair value of derivative instruments as of December 31, 2020 and 2019.

	2020			
	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Derivatives designated as hedging instruments				
Interest rate contracts	Other Assets	\$ —	Other Liabilities	\$ 167
Derivatives not designated as hedging instruments				
Interest rate contracts	Other Assets	492	Other Liabilities	492
Total derivatives		\$ 492		\$ 658

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.

December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

	2019			
	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Derivatives designated as hedging instruments				
Interest rate contracts	Other Assets	\$ —	Other Liabilities	\$ 123
Derivatives not designated as hedging instruments				
Interest rate contracts	Other Assets	235	Other Liabilities	235
Total derivatives		\$ 235		\$ 358

Cash Flow Hedges	Location of Gain (Loss) Reclassified from AOCI into Income	Amount of Gain (Loss) Reclassified from AOCI into Income		Amount of Gain (Loss) Recognized in OCI	
		2020	2019	2020	2019
Interest rate contracts	Noninterest income – Other	\$ —	\$ —	\$ (44)	\$ (171)

		2020	2019
Interest rate contracts	Interest on loans	\$ (72)	\$ (14)

Note 17: Goodwill

The changes in the carrying amount of goodwill for the years ended December 31, 2020 and 2019, were:

	2020	2019
Balance as of January 1	\$ 5,567	\$ 5,567
Goodwill acquired during the year	—	—
Impairment losses	—	—
Balance as of December 31	\$ 5,567	\$ 5,567

Note 18: Related Party Transactions

The Bank has loan, deposit and other transactions with its directors and officers, and with organizations and individuals with which they are associated. In management's opinion, such loans and other extensions of credit were made in the ordinary course of business and were made on substantially the same terms (including interest rates and collateral) as those prevailing at the time for comparable transactions with other persons. Further, in management's opinion, these loans did not involve more than normal risk of collectability or present other unfavorable features. The aggregate dollar amount of loans to directors and executive officers who held office at the end of the year, and organizations and individuals with which they are associated, amounted to \$17,946,000 and \$18,612,000 at December 31, 2020 and 2019, respectively.

Note 19: Commitments and Contingencies

The Bank, in the normal course of business, is a party to various financial instruments with off-balance sheet risk to meet the financing needs of customers. These instruments involve elements of credit risk in excess of amounts recognized in the financial statements. The contract amounts of those instruments reflect the extent of involvement STAR has in financial instruments.

Financial instruments whose contract amounts represent credit risk at December 31:

	2020	2019
Commitments to extend credit	\$ 614,422	\$ 576,371
Standby letters of credit	6,765	7,574
Forward sale commitments	12,000	2,409

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.

December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

STAR's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amount of those instruments. STAR follows the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

Commitments to extend credit are agreements to loan funds to customers providing there is compliance with terms of the commitment. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Bank evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained if deemed necessary by the Bank upon extension of credit is based on management's credit evaluation of the customer. Collateral held varies but may include accounts receivable, inventory, plant and equipment and real estate.

Letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Bank holds collateral supporting those commitments when deemed necessary.

Forward sale commitments are commitments to sell groups of residential mortgage loans that the Bank originates or purchases as part of its mortgage banking activities. The Bank commits to sell the loans at specified prices in a future period, typically within 90 days. These commitments are acquired to reduce market risk on mortgage loans in the process of origination and mortgage loans held for sale since the Bank is exposed to interest rate risk during the period between issuing a loan commitment and the sale of the loan into the secondary market.

Management does not expect any material losses to result from these financial instruments.

The Company and Bank are also subject to claims and lawsuits which arise primarily in the ordinary course of business. It is the opinion of management that the disposition or ultimate resolution of such claims and lawsuits will not have a material adverse effect on the consolidated financial position of the Company.

The Company is obligated under operating leases for certain office premises and equipment. The following table shows operating lease right of use assets and operating lease liabilities as of December 31, 2020.

Consolidated Balance Sheet		2020	2019
Operating lease right of use assets	Other assets	\$ 7,103	5,449
Operating lease liabilities	Other liabilities	7,449	5,657

The following table shows the components of operating leases expenses for the year ended December 31, 2020.

Consolidated Statement of Income		2020	2019
Operating lease cost	Occupancy expense	\$ 1,927	\$ 1,584

The following table shows future minimum rental commitments for all non-cancellable operating leases with an initial term longer than 12 months for the next five years and thereafter.

2021	\$ 1,749
2022	1,734
2023	1,171
2024	1,082
2025	923
Thereafter	<u>1,866</u>
Total lease payments	8,525
Less: imputed interest	<u>1,076</u>
Present value of operating lease liabilities	<u>\$ 7,449</u>

The following table shows the weighted average remaining operating lease term, the weighted average discount rate and supplemental consolidated statement of cash flows information for operating leases at December 31, 2020

	2020	2019
Weighted average remaining lease term (years)	7.99	6.54
Weighted average discount rate	2.54%	2.76%
Cash paid for amounts included in the measurement of lease liability:		
Operating cash flows from operating leases	\$1,567	\$1,553

Note 20: Regulatory Matters

The Company and Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's and Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and Bank must meet specific capital guidelines that involve quantitative measures of the Company's and Bank's assets, liabilities and certain off-balance sheet items as calculated under U.S. GAAP, regulatory reporting requirements and regulatory capital standards. The Company's and Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

The capital adequacy requirements were heightened by the Basel III Rules, which went into effect on January 1, 2015 with a phase-in period for certain aspects of the rule through 2019. Under the Basel III rules, the Company must hold a capital conservation buffer above the adequately

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.

December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

capitalized risk-based capital ratios. The capital conservation buffer is being phased in from 0.000% for 2015 to 2.50% by 2019. The below minimum capital requirements exclude the capital conservation buffer required to avoid limitations on capital distributions, including dividend payments and certain discretionary bonus payments to executive officers. The capital conservation buffer for 2019 was 2.5%. The net unrealized gain or loss on available for sale securities is not included in computing regulatory capital. The quantitative measures established by regulation to ensure capital adequacy that were in effect on December 31, 2020 and 2019, require the Company and the Bank to maintain minimum capital amounts and ratios (set forth in the following table) of Total, Tier I and Common Equity Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined in the regulation), and of Tier I capital (as defined in the regulation) to average assets (as defined). Management believes, as of the years ended December 31, 2020 and 2019, that the Company and the Bank met all capital adequacy requirements to which they are subject.

Quantitative measures established by regulatory capital standards to ensure capital adequacy require the Company and Bank to maintain minimum amounts and ratios (set forth in the following table) of Total and Tier 1 capital (as defined) to risk-weighted assets (as defined), common equity Tier 1 capital (as defined) to total risk-weighted assets (as defined) and of Tier 1 capital (as defined) to average assets (as defined).

As of December 31, 2020, the most recent notification received from federal banking agencies categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum total risk-based capital, Tier I risk-based capital, common equity Tier I risk-based capital and Tier I leverage ratios as set forth in the following table. There are no conditions or events since that notification that management believes have changed the Bank's category.

STAR Bank's capital amounts and ratios are presented in the following table:

	Actual		Minimum Capital Requirement		Minimum to Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of December 31, 2020						
Total capital (to risk weighted assets)

Tier I capital (to risk weighted assets)						
STAR Financial Bank	223,893	12.39	108,385	6.00	144,513	8.00
Tier I capital (to average assets)						
STAR Financial Bank	223,892	10.53	85,019	4.00	106,274	5.00
Common equity Tier I capital						
STAR Financial Bank	219,908	12.39	81,289	4.50	117,417	6.50

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.
December 31, 2020 and 2019
(Table Dollars in Thousands Except Share Data)

Banking regulations limit the amount that the Bank may pay the Company without prior approval of bank regulatory authorities. At December 31, 2020, retained earnings available for dividends to the Company without such approval totaled approximately \$32,048,000.

Note 21: Disclosures About Fair Value of Assets and Liabilities

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements must maximize the use of observable inputs and minimize the use of unobservable inputs. There is a hierarchy of three levels of inputs that may be used to measure fair value:

Level 1	Quoted prices in active markets for identical assets or liabilities
Level 2	Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities
Level 3	Unobservable inputs supported by little or no market activity and are significant to the fair value of the assets or liabilities

Recurring Measurements

The following tables present the fair value measurements of assets and liabilities recognized in the accompanying balance sheets measured at fair value on a recurring basis and the level within the fair value hierarchy in which the fair value measurements fall at December 31, 2020 and 2019:

	2020 Fair Value Measurements Using			
	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Cash Equivalents				
Money market mutual funds	\$ 4,063	\$ 4,063	\$ —	\$ —
Available-for-Sale Securities				
U.S. Treasury and agency securities	8,435	—	8,435	—
Obligations of states and political subdivisions	244,849	—	244,849	—
Mortgage-backed GSE residential	271,586	—	271,586	—
Pooled trust preferred securities	14,590	—	—	14,590
Interest Rate Swap Assets	492	—	492	—
Interest Rate Swap Liability	(658)	—	(658)	—

	2019 Fair Value Measurements Using			
	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Cash Equivalents				
Money market mutual funds	\$ 22,898	\$ 22,898	\$ —	\$ —
Available-for-Sale Securities				
U.S. Treasury and agency securities	7,632	—	7,632	—
Obligations of states and political subdivisions	130,066	—	130,066	—
Mortgage-backed GSE residential	180,798	—	180,798	—
Pooled trust preferred securities	15,533	—	—	15,533
Interest Rate Swap Assets	235	—	235	—
Interest Rate Swap Liability	(358)	—	(358)	—

Following is a description of the valuation methodologies used for assets and liabilities measured at fair value on a recurring basis and recognized in the accompanying consolidated balance sheets, as well as the general classification of such assets and liabilities pursuant to the valuation hierarchy. There have been no significant changes in the valuation techniques during the year ended December 31, 2020. For assets and liabilities classified within Level 3 of the fair value hierarchy, the process used to develop the reported fair value is described below.

Cash Equivalents

Where quoted market prices are available in an active market, cash equivalents are classified within Level 1 of the valuation hierarchy and include only money market mutual funds. The Company had no cash equivalents classified as Level 2 or Level 3.

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.
December 31, 2020 and 2019
(Table Dollars in Thousands Except Share Data)

Available-for-Sale Securities

Where quoted market prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. If quoted market prices are not available, then fair values are estimated by a third-party pricing service using pricing models, quoted market prices of securities with similar characteristics or discounted cash flows. The inputs used by the pricing service to determine fair value may include one, or a combination of, observable inputs such as benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data market research publications and are classified within Level 2 of the valuation hierarchy. These level 2 securities include U.S. Treasury and agency securities, obligations of state and political subdivisions, and mortgage-backed GSE residential securities. In certain cases where Level 1 or Level 2 inputs are not available, securities are classified within Level 3 of the hierarchy and include pooled trust preferred securities. Based on the lack of observable market data, the Company estimated fair values based on the observable data available and reasonable unobservable market data. The estimated fair value is based on a discounted cash flow model which used appropriately adjusted discount rates reflecting credit and liquidity risks and is further described in the other-than-temporary impairment section of Note 3.

Fair value determinations for Level 3 measurements of securities are the responsibility of the Finance department. The Finance department contracts with a pricing specialist to generate fair value estimates on a monthly or quarterly basis. The Finance department challenges the reasonableness of the assumptions used and reviews the methodology to ensure the estimated fair value complies with accounting standards generally accepted in the United States.

Interest Rate Swap Agreements

Derivative instruments consist of interest rate swaps and interest rate caps. The Company obtained fair values from financial institutions that use internal models with observable market inputs to estimate the values of these instruments (Level 2).

The following is a reconciliation of the beginning and ending balances of recurring fair value measurements recognized in the accompanying consolidated balance sheets using significant unobservable (Level 3) inputs:

	Pooled Trust Preferred Securities
Balance, January 1, 2019	\$ 16,740
Total realized and unrealized gains and (losses)	
Included in net income	\$ —
Included in other comprehensive income	(1,207)
Balance, December 31, 2019	\$ 15,533
Total realized and unrealized gains and (losses)	
Included in net income	\$ —
Included in other comprehensive income	(943)
Balance, December 31, 2020	\$ 14,590
Total gains or (losses) for 2020 included in net income attributable to the change in unrealized gains or losses related to assets and liabilities still held at the reporting date	\$ —
Total gains or (losses) for 2019 included in net income attributable to the change in unrealized gains or losses related to assets and liabilities still held at the reporting date	\$ —

Nonrecurring Measurements

The following table presents the fair value measurement of assets measured at fair value on a nonrecurring basis and the level within the fair value hierarchy in which the fair value measurements fall at December 31, 2020 and 2019.

	2020 Fair Value Measurements Using			
	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Impaired loans (collateral dependent)	\$ 326	—	—	\$ 326
Mortgage servicing rights	1,402	—	—	1,402

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.

December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

	2019			
	Fair Value Measurements Using			
	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Impaired loans (collateral dependent)	\$ 4,998	—	—	\$ 4,998
Other real estate owned	1,782	—	—	1,782

Following is a description of the valuation methodologies used for assets measured at fair value on a nonrecurring basis and recognized in the accompanying consolidated balance sheets, as well as the general classification of such assets pursuant to the valuation hierarchy. The Company has no liabilities measured at fair value on a nonrecurring basis.

Impaired Loans (Collateral Dependent)

Loans for which it is probable that the Company will not collect all principal and interest due according to contractual terms are measured for impairment. An allowable method for determining the amount of impairment includes estimating fair value using the fair value of the collateral for collateral dependent loans. If the impaired loan is identified as collateral dependent, then the fair value method of measuring the amount of impairment is utilized. This method requires obtaining a current independent appraisal of the collateral and applying a discount factor to the value. Impaired loans that are collateral dependent are classified within Level 3 of the fair value hierarchy when impairment is determined using the fair value method.

The Company considers the appraisal or evaluation as the starting point for determining fair value and then considers other factors and events in the environment that may affect the fair value. Appraisals of the collateral underlying collateral-dependent loans are obtained when the loan is determined to be collateral-dependent and subsequently as deemed necessary by the Managed Assets department and Asset Quality Committee. Appraisals are reviewed for accuracy and consistency by the Loan Review department. Appraisers are selected from the list of approved appraisers maintained by management. The appraised values are reduced by discounts to consider lack of marketability and estimated cost to sell if repayment or satisfaction of the loan is dependent on the sale of the collateral. These discounts and estimates are developed by the Loan Review department by comparison to historical results.

Mortgage Servicing Rights

Mortgage servicing rights do not trade in an active, open market with readily observable prices. Accordingly, fair value is estimated using discounted cash flow models having significant inputs of discount rate, prepayment speed and default rate. Due to the nature of the valuation inputs, mortgage servicing rights are classified within Level 3 of the hierarchy.

Mortgage servicing rights are tested for impairment on a quarterly basis. The Company measures mortgage servicing rights through the completion of a proprietary model. The model is tested quarterly using baseline data to check its accuracy.

Unobservable (Level 3) Inputs

The following tables present quantitative information about unobservable inputs used in recurring and nonrecurring Level 3 fair value measurements as of December 31, 2020 and 2019.

	Fair Value at December 31, 2020	Valuation Technique	Unobservable Inputs	Range (Weighted Average)
Impaired loans (collateral dependent)	\$ 326	Market comparable properties	Marketability discount	65.65% - 100% (94.87%)
Pooled trust preferred securities	14,590	Discounted cash flows	Market yield adjustments	0.55% - 0.63% (0.60%)
Mortgage servicing rights	1,402	Discounted cash flows	Constant prepayment rate	10.99% - 43.42% (21.23%)

	Fair Value at December 31, 2019	Valuation Technique	Unobservable Inputs	Range (Weighted Average)
Impaired loans (collateral dependent)	\$ 4,998	Market comparable properties	Marketability discount	0% - 100% (54%)
Pooled trust preferred securities	15,534	Discounted cash flows	Market yield adjustments	1.92% - 1.98% (1.95%)
Mortgage servicing rights	1,782	Discounted cash flows	Constant prepayment rate	0.34% - 32.86% (11.61%)

Sensitivity of Significant Unobservable Inputs

The following is a discussion of the sensitivity of significant unobservable inputs, the interrelationship between those inputs and other unobservable inputs used in recurring fair value measurement and of how those inputs might magnify or mitigate the effect of changes in the unobservable inputs on the fair value measurement.

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.

December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

Pooled Trust Preferred Securities

The significant unobservable inputs used in the fair value measurement of the Company's pooled trust preferred securities are premiums and discounts for underlying institutions. Significant increases (decreases) in either of those inputs in isolation would result in a significantly lower (higher) fair value measurement. Generally, changes in either of those inputs will not affect the other input.

Fair Value of Financial Instruments

The following table presents estimated fair values of the Company's financial instruments at December 31, 2020 and 2019.

	Carrying Amount	Fair Value	Level 1	Level 2	Level 3
December 31, 2020					
Financial assets					
Cash and cash equivalents	\$ 245,190	\$ 245,190	\$ 245,190	\$ —	\$ —
Loans held for sale	3,674	3,863	—	3,863	—
Loans and leases, net	1,689,258	1,694,513	—	—	1,694,513
Interest receivable	9,580	9,580	—	9,580	—
Federal Home Loan Bank stock	6,880	6,880	—	6,880	—
Financial liabilities					
Demand deposits	\$ 2,157,203	\$ 2,157,203	\$ 2,157,203	\$ —	\$ —
Time deposits	131,342	115,503	—	115,503	—
Short-term borrowings	—	—	—	—	—
Long-term borrowings	20,173	20,266	—	20,266	—
Subordinated debt	10,310	8,793	—	8,793	—
Interest payable	72	72	—	72	—
December 31, 2019					
Financial assets					
Cash and cash equivalents	\$ 172,058	\$ 172,058	\$ 172,058	\$ —	\$ —
Loans held for sale	2,274	2,324	—	2,324	—
Loans and leases, net	1,468,393	1,467,844	—	—	1,467,844
Interest receivable	8,105	8,105	—	8,105	—
Federal Home Loan Bank stock	6,880	6,880	—	6,880	—
Financial liabilities					
Demand deposits	\$ 1,587,889	\$ 1,587,889	\$ 1,587,889	\$ —	\$ —
Time deposits	186,109	167,034	—	167,034	—
Short-term borrowings	41,289	41,230	—	41,230	—
Long-term borrowings	20,212	18,992	—	18,992	—
Subordinated debt	10,310	5,614	—	5,614	—
Interest payable	172	172	—	172	—

The following methods were used to estimate the fair value of all other financial instruments recognized in the accompanying consolidated balance sheets at amounts other than fair value.

Cash and Cash Equivalents, Federal Home Loan Bank Stock and Interest Receivable

The carrying amounts approximate fair value.

Loans Held for Sale

For homogeneous categories of loans, such as mortgage loans held for sale, fair value is estimated using the quoted market prices for securities backed by similar loans, adjusted for differences in loan characteristics.

Loans and Leases, net

Fair value is estimated by discounting the future cash flows using market rates for similar loans to similar borrowers. The market rates reflect a market participant assumption about risks associated with nonperformance, illiquidity, and the structure and term of the loans along with local economic and market conditions.

Deposit Liabilities

The fair values disclosed for demand deposits (e.g., interest and noninterest checking, savings and money market accounts) are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). The carrying amounts for variable-rate, fixed-term time deposits approximate their fair values at the reporting date. Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on time deposits.

Short-Term Borrowings and Interest Payable

Notes to Consolidated Financial Statements

STAR Financial Group, Inc.
December 31, 2020 and 2019

(Table Dollars in Thousands Except Share Data)

Fair values for short-term borrowing and interest payable are estimated using a discounted cash flow calculation that applies interest rates currently being offered for similar maturities.

Long-Term Borrowings

Fair values for Federal Home Loan Bank and other borrowings are estimated using a discounted cash flow calculation that applies interest rates currently being offered for similar maturities.

Subordinated Debt

The fair value for subordinated debt is estimated using a discounted cash flow calculation that applies interest rates currently being offered for similar maturities.

Commitments to Originate Loans, Forward Sale Commitments, Letters of Credit and Lines of Credit

The fair value of commitments to originate loans is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of forward sale commitments is estimated based on current market prices for loans of similar terms and credit quality. The fair values of letters of credit and lines of credit are based on fees currently charged for similar agreements or on the estimated cost to terminate or otherwise settle the obligations with the counterparties at the reporting date. The fair value of these items is not material.
